Josh Moore

## **LESSON SUMMARY:**

This weeks lesson is was about the church today. One prominent statistic is that only 20% percent of people would say church is important. Many people have left and never come back. There has been a devaluing of the church in our culture today. Attendance has declined but this is not our main concern. The concern is why you don't attend. The priorities of the culture have been lost. We have turned away from church as a priority to, "we only go when we can." When this is modeled, we don't attend and in turn don't have a true understanding of what church is in relation to God.

Church must be brought back as a priority to our generation.

## **REFLECTION QUESTIONS:**

Is church a priority?

What have you put in place of church?

Do I make sure I connect in community?

The last three times you missed church, why did you miss? Was it for something legitimate or was it due to a lack of priority?

What can you do to reestablish church as a priority in your walk?

Who in your life might you need to go to and tell that church is a priority on this day at this time?
